

Review Access to Automated External Defibrillators (AEDs) and First Aid Kits (FAKs) from GVR Tennis Courts

Part 1 of 3 – Tennis West Center & Tennis East Center

Notes:

- (1) Aid Stations incorporate both a Defibrillator (AED) and a First Aid Kit (FAK).
- (2) Recreation Centers at East, Las Campanas, Madera Vista, Desert Hills and Canoa Hills all have Aid Stations close to the main entrance lobbies. The Exception is the West Center which only has an AED?

West Tennis Center

The Ramada at the Tennis West Center has both an AED and a FAK. The AED is located outside of the Ramada office to the left of the sign-in desk; the FAK is located inside the office against the North wall (see pictures below):

From this busy picture it is not immediately apparent where the AED or FAK is located until you get closer to the sign-in desk and then the AED location becomes more visible. However, there is no signage for the location of the FAK either on the office door or inside the office.

There is an additional small sign for the AED on the office window (see Picture) adjacent to the office door which could be confusing and indicate that an AED is inside the office, this sign should be removed.

The following pictures also show the location of the FAK inside the Ramada office.

The conclusion of the review of the Tennis West Center is that a larger, more prominent, external sign is required for the AED location and a new external sign put on the door of the Ramada office indicating that an FAK is located inside.

Note small AED sign.

An additional larger sign would be better to make the location more visible from a distance.

No FAK sign on door of Ramada.

Also note the small AED sign on the left of the window which could be confusing?

FAK inside the Ramada office.

FAK showing contents

Tennis East Center

No AED or FAK on the tennis courts or any signage as to where they may be found. To gain access to the nearest Aid Station you need to exit the courts using the stairs positioned in the SW corner of court 1 and then use the side gate of the East Center itself to gain access to the pool area. **Note:** This side gate is kept unlocked during normal operating hours. Having gained access to the pool area, proceed to the right where there is another locked gate on the left adjacent to the pool (see picture), which can be opened with a GVR card. The Aid Station is positioned against the West wall of the pool area. There is no signage to guide the person using the side entrance. The following series of pictures (see below) follows the route described above. Alternatively, you can use the external frontage walkway to gain access to the main entrance of the building but this is a longer route to take.

East Tennis Center sign-in desk.

Note: There is space in the wooden locker to install both an AED and a small FAK.

East center side gate entrance
(kept open)

GVR card operated gate on left, en
route to nearest Aid Station.

Or walk out to the frontage
walkway to access the main
entrance (longer route).

Note existing AED and FAK sign not easily seen from this position. The signs need to be made more visible.

Note small AED and FAK signs.
